## EDUCATION

|                                                                                                                              |                                         |
|------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------|
| <b>G H Rasoni College of Engineering and Management</b><br><i>Bachelor of Technology in Data Science; Expected June 2026</i> | Nagpur, India<br>June 2022 – Present    |
| <b>Saraswati Uchcha Madhyamik Vidyalaya Junior College</b><br><i>Higher Secondary Certificate (12th Grade)</i>               | Nagpur, India<br>June 2020 – April 2022 |
| <b>New English High School &amp; Junior College</b><br><i>Secondary School Certificate (10th Grade)</i>                      | Nagpur, India<br>May 2019 – May 2020    |

## TECHNICAL SKILLS

**Programming Languages:** C ,C++ ,Python, JavaScript, SQL, PHP, TypeScript, HTML5, CSS3  
**Web Technologies:** HTML, CSS, Laravel, React.js, Node.js, Express.js, Three.js,MySQL ,FastAPI , RESTful  
**Data Science & ML:** Pandas, Scikit-learn, NumPy, Machine Learning, EDA, Data Visualization  
**Tools & Platforms:** Git, AWS, Excel, Tableau, Low-Code Development  
**Core Competencies:** Data Analysis, Backend Development, Big Data, Full Stack Development, LLMs

## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                       |                                      |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|
| <b>Backend Developer Intern</b><br><i>Easy2IT Techno Solutions LLP</i> <ul style="list-style-type: none"><li>Developing backend features using Laravel and MySQL for production web applications</li><li>Designed and implemented reports and invoice modules, improving operational efficiency</li><li>Managing database architecture and writing optimized SQL queries for data integrity</li></ul> | Dec 2025 – Present<br>Pune, India    |
| <b>Data Scientist Intern</b><br><i>VOIS (Vodafone Intelligent Solutions)</i> <ul style="list-style-type: none"><li>Developed conversational data analysis solutions using LLMs for automated insights</li><li>Performed EDA and data cleaning on large datasets to extract actionable business insights</li><li>Built machine learning models using Python, Pandas, and Scikit-learn</li></ul>        | Sep 2025 – Oct 2025<br>Remote, India |
| <b>Frontend Developer Intern</b><br><i>ApexPlanet Software Pvt Ltd</i> <ul style="list-style-type: none"><li>Developed responsive web interfaces using HTML, CSS, and JavaScript for client projects</li><li>Implemented modern frontend best practices including mobile-first design</li></ul>                                                                                                       | Aug 2025 – Oct 2025<br>Remote, India |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Multi-Vendor Consumption Tracking &amp; Invoice Automation Platform</b><br><i>Laravel, MySQL, PHP, PDF Generation</i> <ul style="list-style-type: none"><li>Built Laravel-based multi-vendor system managing daily consumption entries with automated PDF invoice generation</li><li>Designed normalized database with complex SQL aggregations, role-based access control, and optimized queries</li></ul> |
| <b>Lumina AI – Smart Data Analyst Dashboard</b><br><i>Next.js, TypeScript, Recharts, OpenRouter API</i> <ul style="list-style-type: none"><li>Built an AI-powered dashboard for automated data cleaning, profiling, and visualization</li><li>Implemented interactive charts and natural language querying for data insights</li></ul>                                                                         |
| <b>Smart Attendance Tracker using Face Recognition</b><br><i>Python, Flask, OpenCV, SQLite</i> <ul style="list-style-type: none"><li>Real-time face recognition attendance system with webcam-based facial detection and recognition</li><li>Built web interface for registration, live tracking, and attendance record management using OpenCV</li></ul>                                                      |

## CERTIFICATIONS & ACHIEVEMENTS

**AWS Solutions Architecture Job Simulation** – Amazon Web Services  
**Data Analytics & Visualization Job Simulation** – Accenture North America  
**GenAI Powered Data Analytics Job Simulation** – Tata Group  
**Advanced Software Engineering Job Simulation** – Walmart USA  
**Data Analytics Job Simulation** – Deloitte Australia
